Experience

Software Development Engineer (L4)

[Amazon](#) | Jordan | Aug • 2022 - Oct • 2023

- I have actively contributed to the development of the **Exchange** program, a prominent feature introduced by Amazon in India. This innovative program enables retail customers to exchange their old devices for new ones, while enjoying a discounted price on the new device.
- I had the privilege of working on the **XXL** project, a large-scale endeavour that encompassed a wide range of services within Amazon. Throughout the project, I actively contributed to the development of various services, both customer-facing and partner-facing services for Amazon customers and partners.
- The core work was **Java** back-end development, with **AWS** as cloud service.

Software Developer • Java Backend

[UniTicker](#) | Jordan | Aug • 2021 - Aug • 2022

- I have successfully improved a **trading** raw data processor by incorporating new functionalities. Additionally, I developed a Java Spring Boot-based mock API to rigorously test a highly sensitive feature.

Education

BSc • Computer Science

[University of Jordan](#) | Jordan | 2017 - 2021 | GPA 3.66 / 4

Achievements

- Jordanian Collegiate Programming Contest **2020** - **10th** place
- Jordanian University Collegiate Programming Contest **2020** - **2nd** place
- Jordanian Collegiate Programming Contest **2019** - **17th** place
- Jordanian University Collegiate Programming Contest **2019** - **3rd** place
- Jordanian University Collegiate Programming Contest **2018** - **30th** place

Feedback At Amazon

“

Mustafa has rigid technical background and proper understanding of Software Development and Computer Science Fundamentals. As a new hire, he was able to ramp up on Amazon Systems and Tools, relatively quickly with minimal support from his team mates. He was also able to pick up the communication workstream from the previous owner smoothly and within 1-2 days was able to figure out a solution for a problem that was blocking the stream for more than a month. He has also managed to earn his team's trust and get them rely on him for support on environment setups and resolving technical challenges.

He demonstrated high level of ownership, never says this is not my job, and always ready to support on any piece of the project in order to assure successful delivery - **Direct Manager.**

“

Mustafa can adapt easily. He was assigned to tasks in 5 different streams in short period of time, and he was able to focus on the task's scope assigned to him and deliver them on time.

Mustafa's ownership and helping others are high. He helped multiple team members on their deployments and bug fixes - **L5 SDE, Teammate.**

“

Thank you Mustafa for your ownership and putting the success of the team above own interest by welcoming tasks on variant streams as needed to keep the project on track - **Direct Manager.**

“

You have impressive coding and problem solving skills, keep up the good work - **Senior SDE, Teammate.**

“

Mustafa needs to improve his verbal communication style in away that better conveys his self-confidence and solid tech background and judgement to his stakeholders. This will allow him to gain the recognition and trust he deserves and will allow him to spot himself as a candidate for more challenging work and better opportunities. I would also recommend Mustafa to express his opinions more freely when he disagrees with someone, and provide a concrete set of data points that support his point of view - **Direct Manager.**

”
